SKILLS

Programming Languages	Python, SQL
ML & AI	Generative AI, LLMs, NLP, RAG, Time Series, Deep Learning, Machine Learning (ML)
Frameworks & Tools	PyTorch, Scikit-learn, BigQuery, Cloud run, LangGraph, PySpark, LangChain, Flask, Apache Spark
MLOps & Version Control	AWS, Docker, MLflow, Git, GitHub, GCP, REST APIs, CI/CD

PROJECTS & EXPERIENCE

Product Recommendation Aug 2025 – Sept 2025

- Designed and deployed a Flask-based recommendation system on GCP Cloud Run using Docker, reducing deployment time by 40% through optimized containerization and automated CI/CD pipelines.
- Engineered data pipelines to fetch customer cluster data from Google Cloud Storage via BigQuery.
- Implemented robust logging and monitoring on GCP, enabling 99.9% uptime.

SmartSupplyGen: Supply Chain Optimizer June 2025 – Sept 2025

- Built a LangChain-based GenAI model to optimize inventory, reducing stock imbalances by 35% with ARIMA forecasts (94% accuracy) on 500+ data points.
- Automated invoice generation using Large Language Model, cutting manual effort by 70% for 200+ contracts, achieving 98% accuracy in document processing.

Stock Recommendation Engine Aug 2024 – Mar 2025

- Developed a rule-based system with ARIMA, analyzing 400+ stocks with 90% accurate 7-day predictions, benefiting 150 users with 85% satisfaction.
- Integrated OpenAI GPT via LangChain for a chatbot, answering 300+ queries with 85% relevance and 90% user engagement.
- Optimized for 10 industries, enhancing personalized picks by 40% using market cap and PE ratio filters.

HACKATHONS & ACHIEVEMENTS

Winner – College Hackathon 2025: Created an ML solution for agricultural yield prediction, reducing errors by 25% using predictive modeling.

National Finalist – Smart India Hackathon 2024: Developed an LSTM-based Indian Sign Language detection model with 89% gesture recognition accuracy.

PUBLICATIONS & RESEARCH

In Development (Anticipated Completion: September 2025): Developed a real-time gesture recognition system for Indian Sign Language (ISL) using LSTM, achieving 89% accuracy.

Under Review (Expected Decision: August 2025): Designed and evaluated a time-series forecasting model using ARIMA, achieving 92% accuracy in predicting monthly crop price trends.

EDUCATION

Dr. D.Y. Patil Institute of Technology, Pune
Bachelor of Engineering in Artificial Intelligence and Data Science

Nov 2022 – May 2026
